Railways have taken a number of steps to improve catering services in running trains. These include standard meals served in hygienically packed casseroles, use of branded products and use of eco-friendly material for serving beverages, curd etc. Special drives are launched from time to time to ensure this.

As regards thefts of passenger belongings, the reported cases are registered and investigated by the Government Railway Police, which function under the control of the State Governments concerned.

Unauthorised hawking and vending in the trains and railway premises are punishable offences. Railways conduct surprise and regular checks with the help of Government Railway Police and Railway Protection Force to curb the menace.

Clearance for Rail Projects
